

## Payment Gateway API

Payments integrated into your software

Integrating payment functionality can add significant value to your software application; however the time, effort, and costs to build and maintain a secure payment processing infrastructure are substantial.

Accept credit card, debit card, and ACH payments directly within your existing billing & collections software with our payment gateway API. Fully featured, our API allows you to avoid storing or transmitting sensitive financial information on your system through the use of tokenization technology.

Supports multi-factor user authentication

Flexibility to bring your own bank or merchant account

PCI-DSS Level 1 certified and tokenized

Verify ABA routing & bank account information

One-time or recurring payments

Access credit & risk management solutions
